Student Enrollment & Course Management System (SECMS)

User Story:

The Student Enrollment & Course Management System is a comprehensive Salesforce application designed to streamline and automate the academic enrollment operations of an educational institute. This system enables administrators, enrollment officers, and instructors to efficiently manage student records, course offerings, enrollments, instructor assignments, approval processes, payments, and reporting—all within a unified Salesforce environment.

1. INTRODUCTION

1.1 Project Overview:

This project aims to centralize all student, course, and enrollment-related data within a

single Salesforce application to ensure easy data access, structured workflows, and accurate reporting. The system allows Enrollment Officers to manage student admissions, course registrations, and communication effectively, while instructors and administrators gain full transparency into course allocations and academic progress. The solution also enables automated instructor assignment, task creation, validation checks, and multi-level approval processes for enrollment management.

With Salesforce Flows, Approval Processes, Validation Rules, Reports, and Dashboards, the organization can ensure that all enrollment operations—from admission to course completion—are handled systematically and with continuous monitoring of key performance indicators such as enrollment volume, revenue, student status distribution, and pending approvals.

The primary purpose of SECMS is to replace manual and fragmented enrollment processes with a scalable, automated, and secure Salesforce solution that ensures:

- Accurate student data management
- Structured enrollment workflows
- Automated approvals and validations
- Transparent reporting and monitoring

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I’m trying to	But	Because	Which makes me feel
PS-1	Enrollment Officer	manage student enrollments efficiently	enrollment data is scattered	systems are manual and unintegrated	frustrated and error-prone
PS-2	Administrator	track enrollments and revenue	reporting is delayed	data is not centralized	uncertain in decision-ma king

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

2.2 Empathy Map Canvas

User Persona: Enrollment Officer

- **Think & Feel:** Concerned about double bookings and revenue loss
- **Hear:** Complaints from students and management
- **See:** Multiple spreadsheets and emails
- **Say & Do:** Rechecks data, follows up manually
- **Pain:** Duplicate entries, approval bottlenecks
- **Gain:** Automation, dashboards, faster processing

2. IDEATION PHASE

2.2 Empathy Map Canvas

User Persona: Enrollment Officer

2.3 Brainstorming & Idea Prioritization

Step 1 – Brainstormed Ideas

- Spreadsheet automation
- Standalone enrollment portal
- ERP integration
- Salesforce-based enrollment system

Step 2 – Grouping

- Manual solutions
- Semi-automated solutions
- Fully automated cloud solutions

Step 3 – Prioritization

Salesforce-based SECMS was selected due to **high feasibility** and **high impact**.

2.3 Brainstorming & Idea Prioritization — Student Enrollment & Course Management System (SECMS)

3.REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map Stages

covered:

- Awareness & Registration
- Course Selection
- Enrollment Request
- Fee Payment
- Approval
- Instructor Assignment
- Reporting & Completion

3.1 Customer Journey Map – Student Enrollment & Course Management System (SECMS)

3.2 Solution Requirements Functional Requirements

FR No	Epic	Description
FR-1	Student Management	Manage student records
FR-2	Course Management	Create and manage courses
FR-3	Enrollment Processing	Request, approve, reject enrollments
FR-4	Instructor Assignment	Auto-assign instructors
FR-5	Reporting	Dashboards and reports

Non-Functional Requirements NFR-1: Usability

The system shall provide a simple, intuitive, and user-friendly interface that enables enrollment officers, administrators, instructors, and students to perform operations efficiently with minimal training. Navigation shall be organized through clearly labeled tabs, dashboards, and forms to reduce user effort and errors. **Examples:**

- Quick student registration form
- One-click enrollment approval
- Role-based dashboards

NFR-2: Security

The system shall ensure the confidentiality, integrity, and protection of student and institutional data through secure authentication, authorization, and access controls. Sensitive information such as personal data, enrollment history, and academic records shall only be accessible to authorized users. **Examples:**

- Only admins can modify course details
- Instructors view only assigned students
- Students cannot access other student records

NFR-3: Reliability

The system shall operate consistently and accurately without failures during enrollment processing, approvals, and reporting. Automation logic shall execute correctly to avoid duplicate or incorrect enrollments.

Examples:

- No duplicate course registration
- Accurate status updates after approvals
- Consistent report generation

NFR-4: Performance

The system shall provide fast response times for all operations to ensure smooth and uninterrupted user experience, especially during peak admission periods.

Examples:

- Quick dashboard refresh
- Fast search for student records
- No lag during bulk uploads

NFR-5: Scalability

The system shall support future growth in the number of students, courses, departments, and users without degradation in performance or functionality. It shall allow easy addition of new modules and features. **Examples:**

- Add new departments without redesign
- Handle increased admissions annually
- Extend to mobile or portal integration

NFR-6: Availability

The system shall be continuously accessible to users during institutional working hours and must minimize downtime. The platform shall support high availability for academic operations.

Examples:

- 24/7 cloud access
- Reliable during peak admission season
- Automatic backup of student records

3.3 Data Flow Diagram

- User inputs student and enrollment data
- System validates and stores records
- Approval process routes data
- Reports and dashboards consume processed data.

The system processes enrollment requests, validates data, routes approvals, assigns instructors, and generates reports.

3.3 Data Flow Diagram – Student Enrollment & Course Management System (SECMS)

3.4 Technology Stack

Layer	Technology
UI	Salesforce Lightning
Logic	Salesforce Flows
Database	Salesforce Objects
Automation	Validation Rules, Approval Process
Reporting	Reports & Dashboards

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

SECMS directly addresses fragmented enrollment workflows by aligning user behavior, constraints, and automation using Salesforce-native capabilities.

4.1 Problem–Solution Fit

— Student Enrollment & Course Management System (SECMS)

4.2 Proposed Solution

Functional Requirements

Parameter	Description
Problem	Manual enrollment handling
Solution	Salesforce-based SECMS
Novelty	End-to-end automation
Social Impact	Improved student experience
Revenue Model	Institutional deployment
Scalability	Multi-department support

4.3 Solution Architecture

The architecture integrates Salesforce objects, automation flows, approval processes, dashboards, and security layers.

4.3 Solution Architecture

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- Agile methodology
- Epics → Stories → Story Points
- Sprint-based execution
- Velocity calculation used for estimation

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	As a system administrator, I want to create a Salesforce developer account so that I can configure and deploy the Student Enrollment system..	1	High	Member1
Sprint-1	Data Modeling	USN-2	As an admin, I want to create custom objects for Student,	3	High	Member2

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
			Course, Enrollment, and Instructor so that academic data can be stored and managed efficiently.			
Sprint-2	Data Modeling	USN-3	As a user, I want dedicated tabs for each object so that I can easily navigate between students, courses, enrollments, and instructors.	3	High	Member3
Sprint-2	Data Modeling	USN-4	As an admin, I want to create relevant fields such as student details, course information, and enrollment status so that complete records can be captured accurately.	5	High	Member4
Sprint-2	Data Modeling	USN-5	As an enrollment officer, I want a centralized Lightning App so that I can access all academic operations from one interface.	3	High	Member4
Sprint-2	Data Modeling	USN-6	As an admin, I want to define relationships between students, courses, and enrollments so that the system can logically link and track academic activities.	5	Medium	Member1
Sprint-2	Data Modeling	USN-7	As a user, I want customized page layouts so that only relevant information is displayed, improving clarity and ease of data entry.	5	High	Member2
Sprint-3	Automation	USN-8	As a system, I want to validate input data such as mandatory fields and enrollment limits so that incorrect or incomplete records are prevented.	3	High	Member4
Sprint-3	Automation	USN-9	As a system, I want automated flows to handle enrollment processing and notifications so that manual effort is reduced and processes become faster.	3	High	Member4
Sprint-3	Automation	USN-10	As an administrator, I want an approval process for enrollment requests so that registrations are verified before confirmation.	5	High	Member1
Sprint-4	Security	USN-11	As an admin, I want to configure role-based security so that users can only access data relevant to their responsibilities.	5	High	Member2
Sprint-5	Reports	USN-12	As a manager, I want reports on student enrollments, course registrations, and instructor assignments so that I can monitor academic operations.	4	High	Member3
Sprint-6	Dashboards	USN-13	As a manager, I want visual dashboards showing enrollment	4	Medium	Member4

6. Project Development Phase:

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
			statistics and trends so that I can quickly analyze system performance			

Project Flow:

Milestone 1: Salesforce Developer Account Creation

Milestone 2: Custom Object Creation (Student, Course, Enrollment, Instructor)

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6Days	31 Oct 2022	05 Nov 2022		
Sprint-3	20	6Days	07 Nov 2022	12 Nov 2022		
Sprint-4	20	6Days	14 Nov 2022	19 Nov 2022		

Milestone 3: Tabs Creation

Milestone 4: Lightning App Creation

Milestone 5: Fields Creation

Milestone 6: Create Relationships

Milestone 7: Page Layout Customization

Milestone 8: Validation Rules

Milestone 9: Flows (Automation)

Milestone 10: Approval Process

Milestone 11: Reports

Milestone 12: Dashboards

Milestone 13: Security Setup

Milestone 14: Conclusion

What you'll learn

1. Real-time Salesforce project implementation

2. Designing custom objects and relationships
3. Creating page layouts & record types
4. Writing validation rules
5. Building automation with flows
6. Creating approval workflows
7. Developing reports & dashboards
8. Setting up security with profiles, permission sets, and sharing
9. End-to-end application testing

Milestone 1-Salesforce :

Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Salesforce has everything you need to run your business from anywhere. Using standard products and features, you can manage relationships with prospects and customers, collaborate and engage with employees and partners, and store your data securely in the cloud. So what does that really mean? Well, before Salesforce, your contacts, emails, follow-up tasks, and prospective deals might have been organized something like this:
<https://youtu.be/r9EX3lGde5k>

Activity 1: Creating Developer Account:

Creating a developer org in Salesforce.

Go to <https://developer.salesforce.com/signup>

On the sign up form, enter the following details:

Build enterprise-quality apps fast to bring your ideas to life

- Build apps fast with drag and drop tools
- Customize your data model with clicks
- Go further with Apex code
- Integrate with anything using powerful APIs
- Stay protected with enterprise-grade security
- Customize UI with clicks or any leading-edge web framework

Sign up for your Salesforce Developer Edition
A full-featured copy of the Platform, for free

Complete the form to start your free trial. Our team will be in touch to help you make the most of your trial.

First Name*
Your first name

Last Name*
Your last name

Email*
Your email address

Role*
Your job role

Company*
Company Name

First name & Last name

Email

Role : Developer

Company : College Name

Country : India

Postal Code : pin code

Username : should be a combination of your name and company This need not be an actual email id, you can give anything in the format :

username@organization.com

Click on sign me up after filling these.

Activity 2: Account Activation:

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account
3. Give a password and answer a security question and click on changepassword.

Change Your Password

Enter a new password for lead@sb.oom.
Make sure to include at least:

- 8 characters
- 1 letter
- 1 number

* New Password
..... Good

* Confirm New Password
..... Match

Security Question
= In what city were you born?

* Answer
asdfghjkl

Change Password

4. Then you will redirect to your salesforce setup page.

Milestone 2 – Objects:

Activity 1: Creating Student Object:

The purpose of creating the Student custom object is to store and manage information about students such as their personal details, contact information, and enrollment status.

To create the Student object:

Go to the Setup page.

Click on Object Manager.

Click on Create → Custom Object.

Enter the details as below:

1. Label: Student
2. Plural Label: Students
3. Object Name: Student
4. Record Name: Student Name
5. Data Type: Text
6. Under Optional Features, select:
7. Allow Reports
8. Allow Activities (optional but recommended)
9. Track Field History (optional, if you want)
10. Under Search Status, select: 11. Allow Search

12. Click Save.

SETUP > OBJECT MANAGER
Student

Field Name **Instructor**

Description

Specify the title that the related list will have in all of the layouts associated with the parent.

Related List Label **Enrollments**

Select the page layouts that should include this field. The field will be added as the last field in the first 2-column section of these page layouts. The field will not appear on any pages if you do not select a layout.

To change the location of this field on the page, you will need to customize the page layout. To change the values that appear, you will need to customize the Record Types.

Add Related List **Page Layout Name**

☒ Instructor Layout

☒ Append related list to users' existing personal customizations

Milestone 5 – Validation Rules:

Activity 1: Student Email Domain Validation Purpose:

To ensure students use only allowed institutional email addresses.

Steps:

Go to Setup → Object Manager → Student__c.

Click Validation Rules → New.

Rule Name: Student_Email_Domain_Validation.

Error Condition Formula: (example for @student.edu)

- NOT(CONTAINS(Email__c, "@student.edu"))

Error Message: Email must be a valid student institutional email.

Error Location: Field → Email__c.

Click Save.

The screenshot shows the Salesforce Setup page for the Student__c object. The left sidebar contains a list of navigation options: Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Object Access, Triggers, Flow Triggers, and Validation Rules. The main content area is titled 'Validation Rule Edit' and includes a 'Save' button. The 'Rule Name' field is set to 'Email_Must_Be_Student_Domain'. The 'Active' checkbox is checked. The 'Error Condition Formula' section shows an example formula: `NOT (CONTAINS (Email__c, "@student.edu"))`. The 'Functions' panel on the right lists various functions, including ABS, ACOS, ADDMONTHS, AND, ASCII, and ASIN. The 'Check Syntax' button is located at the bottom of the formula editor.

Approval Processes

Open Approvals App

Approvals are complex business processes that require information gathering and planning before implementing. It is recommended that you follow the instructions below before getting started.

1. Read the help topic
2. View the checklist
3. Create a custom user hierarchical relationship field
4. Create email templates
5. Create an approval process using either the Jump Start or Standard Wizard
6. Add Approval History Related List to all page layouts
7. Activate the process to deploy to your users

Manage Approval Processes For Enrollment

A listing of both active and inactive approval processes for **Enrollments** is displayed below. To create a new approval process, click **Create New Approval Process** then select **Use Jump Start Wizard** to set up your short steps. Or, select **Use Standard Wizard** to configure all approval options.

Create New Approval Process

Use Jump Start Wizard

Use Standard Setup Wizard

Reorder

Approval Process Edit

Approval Enrollment Request

Step 1. Enter Name and Description

Enter a name and description for your new approval process.

Enter Name and Description

Process Name: Approval Enrollment Request

Unique Name: Approval Enrollment Request

Description: Approval process for Enrollment requests — sends to Training Manager

Step 2. Specify Entry Criteria

Previous Save Next

If only certain types of records should enter this approval process, enter that criteria below. For example, only expense reports from employees at headquarters should use this approval process.

Specify Entry Criteria

Use this approval process if the following criteria are met

Field	Operator	Value	
Enrollment: Enrollment Status	equals	Requested	AND
--None--	--None--		AND
--None--	--None--		AND
--None--	--None--		AND
--None--	--None--		

6. Add Approval Step:
7. Approver: specific Training Manager user.

The screenshot shows the 'Approval Processes' setup page. The main heading is 'Approval Processes' with a 'SETUP' icon. Below it, the page is titled 'Approval Step Edit' and 'Training Manager'. The current step is 'Step 1. Enter Name and Description', which is 'Step 1 of 3'. There are 'Save', 'Next', and 'Cancel' buttons at the top right. A note says 'Enter a name, description, and step number for your new approval step.' Below this is a section titled 'Enter Name and Description' with a red 'Required Information' icon. It contains three fields: 'Name' (with value 'Training Manager'), 'Unique Name' (with value 'Training_Manager'), and 'Description' (empty). At the bottom right, there are 'Save', 'Next', and 'Cancel' buttons, with the 'Save' button highlighted by a red box.

8. Under Final Approval Actions:
9. Add Field Update to set Enrollment_Status__c = "Approved".

The screenshot shows the 'Field Updates' setup page. The main heading is 'Field Updates' with a 'SETUP' icon. Below it, the page is titled 'Field Update Edit'. There are 'Save', 'Save & New', and 'Cancel' buttons at the top right. A note says 'Define the field update, including the object associated with the workflow rule, approval process, or entitlement process, the field to update, and the value to apply. Note that the fields are shown only for the type that you select.' Below this is a section titled 'Identification' with three fields: 'Name' (with value 'Status to Approved'), 'Unique Name' (with value 'Status_to_Approved'), and 'Description' (empty). Below these are four fields: 'Object' (with value 'Enrollment'), 'Field to Update' (with value 'Enrollment: Enrollment Status'), 'Field Data Type' (with value 'Picklist'), and 'Re-evaluate Workflow Rules after Field Change' (with an unchecked checkbox). At the bottom right, there are 'Save', 'Save & New', and 'Cancel' buttons, with the 'Save' button highlighted by a red box. Below the 'Identification' section is a section titled 'Specify New Field Value' with a 'Picklist Options' section. It contains three radio buttons: 'The value above the current one', 'The value below the current one', and 'A specific value' (which is selected). Next to the selected radio button is a dropdown menu with the value 'Approved'.

10. Under Final Rejection Actions:
11. Add Field Update to set Enrollment_Status__c = "Rejected".

13. Activate the approval process.

Milestone 7- Tabs

Activity 1: Creating a Tab for the Student Object:Goto Setup.

1. In the Quick Find box, type Tabs.
2. Under Custom Object Tabs, click New.
3. Select Student from the object list.

4. Choose a tab style (icon).
5. Click Next, assign it to all profiles, and then click Save.

The screenshot shows the Tableau Setup interface. On the left, a sidebar contains a search bar with 'tab' entered, and a list of settings categories: Feature Settings, Analytics, and User Interface. Under Analytics, 'Tableau' is expanded, showing 'Tableau Embedding', 'Tableau UAF Claims Definition', and 'User Interface'. Under User Interface, 'Console Settings' is expanded, showing 'Loaded Console Tab Limit' and 'Rename Tabs and Labels'. The 'Tabs' option under 'Rename Tabs and Labels' is highlighted. The main content area is titled 'Edit Custom Object Tab' and 'Students'. It contains a section 'Custom Tab Definition Edit' with 'Custom Object Tab Information'. This section has three fields: 'Tab Label' (Students), 'Object' (Student), and 'Tab Style' (Airplane). Below these fields, there is an optional section for 'Choose a Home Page Custom Link to show as a splash page the first time your users click on this tab.' with a 'Splash Page Custom Link' dropdown set to '--None--'. At the bottom, there is a 'Description' field and 'Save' and 'Cancel' buttons.

Activity 2: Creating Remaining Tabs

Now create the Tabs for the remaining Objects, they are “Courses, Instructors, Enrollment”.

Follow the same steps as mentioned in Activity -1

Milestone 8 - The Lightning App

Activity 1: Creating the Lightning Application for the Project Navigate to Setup.

Enter App Manager in the Quick Find search box.
Click New Lightning App.
Provide the app details:

App Name: Student Enrollment & Course Management

Developer Name auto-fills

Description: Optional, but can describe the purpose of the app

Click Next and choose the following settings:

App Branding (optional): Add logo or select color theme

Navigation Style: Choose Standard Navigation

Click Next and assign the app to specific profiles (e.g., **Admin, Enrollment Officer, Instructor**).

Click Next to select the items (tabs) to be included in the app. Add:

1. Student
2. Course
3. Instructor
4. Enrollment
5. Reports
6. Dashboards
7. Home
8. Tasks

Click Next and review the app settings.

Finally, click Save & Finish.

The screenshot displays the 'Lightning Experience App Manager' interface. At the top, there's a navigation bar with 'Setup', 'Home', and 'Object Manager'. Below this, a search bar contains 'app manager', and a dropdown menu shows 'App Manager' selected. On the right, there are buttons for 'New Lightning App' and 'New External Client App'. The main section is titled 'App Details & Branding' with the instruction: 'Give your Lightning app a name and description. Upload an image and choose the highlight color for its navigation bar.' The interface is split into two columns: 'App Details' and 'App Branding'. In the 'App Details' column, the 'App Name' field is highlighted with a red box and contains 'Student Enrollment & Course Management'. Below it, the 'Developer Name' field contains 'Student_Enrollment_Course_Management'. The 'Description' field is empty with the placeholder text 'Enter a description...'. In the 'App Branding' column, the 'Image' field shows a placeholder image with a 'Clear' link below it. The 'Primary Color Hex Value' field contains '#0070D2'. At the bottom, there's a section for 'Org Theme Options' with a checkbox labeled 'Use the app's image and color instead of the org's custom theme'.

☐ Use the app's image and color instead of the org's custom theme

Navigation Items

Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename the navigation items available only for phone or only for desktop. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.

User Profiles

Choose the user profiles that can access this app.

Milestone 9 – Page Layouts and Record:

Activity 1: Create Record Types for Enrollment:

Purpose:

To separate New Enrollment vs Re-Enrollment processes.

Steps:

1. Go to Setup → Object Manager → Enrollment__c.
2. Click Record Types → New.

3. For the first record type:

- Existing Record Type: Master
- Record Type Label: New Enrollment
- Enable for required profiles (Admin, Enrollment Officer).
- Select the default Page Layout → Save & New.

4. For the second record type: • Record Type Label: Re-Enrollment • Enable for same profiles.
• Select the default Page Layout → Save.

Activity 2: Separate Page Layouts for Each Enrollment Record Type

Purpose:

To show different fields for New Enrollment vs Re-Enrollment.

Steps:

- 1.Enrollment__c object → click Page Layouts.
- 2.Click New to create a layout for New Enrollment:
 - Clone from existing Enrollment Layout → name it New Enrollment Layout → Save.
 - Keep fields relevant for first-time enrollment: Student, Course, Instructor, Enrollment Date, Status, Fees, etc.
 - Remove unnecessary re-enrollment fields if any. • Click Save.

The screenshot shows the Salesforce Page Layout Editor for the Enrollment object. The left sidebar contains a navigation menu with options: Details, Fields & Relationships, Page Layouts (highlighted with a red box), Lightning Record Pages, Buttons, Links, and Actions, and Compact Layouts. The main area is titled 'Create New Page Layout'. It includes a message: 'As an option, you may select an existing layout to clone. If you create a page layout without cloning, your page layout will not include the standard fields.' Below this, there are two input fields: 'Existing Page Layout' with a dropdown menu showing 'Enrollment Layout' (highlighted with a red box), and 'Page Layout Name' with a text box containing 'New Enrollment Layout' (highlighted with a red box). At the bottom right of this section are 'Save' and 'Cancel' buttons (the 'Save' button is highlighted with a red box).

Below the 'Create New Page Layout' section, the 'Save' button is highlighted with a red box. The 'Quick Find' field is set to 'Field Name'. The 'Fields' list on the left includes: Section, Blank Space, Comments, Course, Enrollment Date, Enrollment Status, Fees Paid, Instructor, Student, and Course Fee. The 'Fields' list is highlighted with a red box. The 'Fields' list is displayed in a table format:

Field Name	Field Type	Field Value
Enrollment Name	Text	Sample Text
Student	Text	Sample Text
Course	Text	Sample Text
Instructor	Text	Sample Text
Enrollment Date	Date	12/22/2025
Enrollment Status	Text	Sample Text
Fees Paid	Text	✓
Comments	Text	Sample Text
Course Fee	Text	\$123.45

- 3.Again, click New to create Re-Enrollment Layout:
 - Clone existing layout → name it Re-Enrollment Layout → Save.
 - Include fields like previous Enrollment reference (if any), Re-Enrollment Reason, Status, Fees, etc. • Click Save.

4. Click Page Layout Assignment → Edit Assignment.

5. For each profile and record type:

- New Enrollment → use New Enrollment Layout.

6. Re-Enrollment → use Re-Enrollment Layout.

Click Save.

Activity 3: Enrollment Related Lists to Parent Objects:

Purpose:

To see all Enrollments from Student, Course, and Instructor records.

a) Student → Enrollment Related List Go to Setup → Object Manager → Student__c.

Click Page Layouts → open the main layout. In the palette, select Related Lists.

Drag Enrollments related list onto the layout.

Customize columns if needed → Save. b)

Course → Enrollment Related List

Go to Object Manager → Course__c → Page Layouts.

Open layout → add Enrollments related list.

Save.

c) Instructor → Enrollment Related List

Go to Object Manager → Instructor__c → Page Layouts.

Open layout → add Enrollments related list. Save.

Milestone 10 – Automation with Flow

Activity 1: Auto-Populate Enrollment Date (Record-Triggered Flow)

Purpose:

Set Enrollment_Date__c to today when Enrollment is created.

Steps:

1. Go to Setup → Flows → New Flow.
2. Select Record-Triggered Flow → Create.

3. Object: Enrollment__c.
4. Trigger: A record is created.
5. Optimize for Actions and Related Records → Done.

Select Object

Select the object whose records trigger the flow when they're created, updated, or deleted.

* Object

Enrollment

Configure Trigger

Trigger the Flow When:

- ☒ A record is created
 - ☐ A record is updated
 - ☐ A record is created or updated
 - ☐ A record is deleted
-

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of records that trigger the flow to conserve your org's resources.

Condition Requirements

None ▼

6. Add Update Records element:
 - Label: Set Enrollment Date.
 - Use record that triggered the flow.
 - Field: Enrollment_Date__c → Value: \$Flow.CurrentDate.
7. Save as SetEnrollmentDate → Activate.

 Update Records

Activity 2: Send Email When Enrollment Approved

Purpose:

When Enrollment_Status__c = Approved, send email, alert admin, and set Student to Active.

Steps (high level for document):

1. Create Email Template and Email Alert for student notification.
2. Go to Flows → New → Record-Triggered Flow.

3. Object: Enrollment__c, Trigger on update.
4. Condition: Enrollment_Status__c Equals "Approved".

 Configure Start

Enrollment

Configure Trigger

Trigger the Flow When:

☐ A record is created

☐ A record is updated

☒ A record is created or updated

☐ A record is deleted

Set Entry Conditions

Specify entry conditions to reduce the number of records that trigger the flow and the number of times the flow is executed. Minimizing unnecessary flow executions helps to conserve your org's resources.

If you create a flow that's triggered when a record is updated, we recommend first defining entry conditions. Then select the **Only when a record is updated to meet the condition requirements** option for When to Run the Flow for Updated Records.

Activity 3: Auto-Assign Instructor Based on Course Category

Purpose:

Assign Instructor automatically based on Course category.

Rules:

Technical → Instructor A

Language → Instructor B

Non-Technical → Instructor C

Steps:

1. Prepare Instructor__c records with codes (e.g., INSTR_A, INSTR_B, INSTR_C).
2. Create Record-Triggered Flow on Enrollment__c (created/updated).
3. Add Get Records to fetch related Course__c.
4. Add Decision element on Course__r.Category__c:
5. Technical / Language / Non-Technical outcomes.
6. For each outcome:
7. Get Instructor record (A/B/C) based on code or name.
8. Update Records: set Instructor__c = Get_Instructor_X.Id.
9. Save as AutoAssign_Instructor → Activate.

Activity 4: Auto-Create Task for Follow-Up

Purpose:

When Enrollment is “Requested”, create a follow-up task for Admin.

Steps:

1. Create Record-Triggered Flow on Enrollment__c.
2. Trigger: Record created or updated; condition Enrollment_Status__c = "Requested".

 Configure Start

10. Save as Create_Followup_Task → Activate.

Milestone 11 – Reports:

Activity 1: Create “Students by Status” Report

1. Go to **Reports** → **NewReport** .
2. Report Type: **Students**.
3. Group rows by **Status__c**. 4. Add columns as needed (Name, Email, Phone).
5. Save as **Students by Status**.

Activity 2: Create “Enrollments by Course” Report

1. New Report → Report Type: **Enrollments**.
2. Grouprows by **Course__r.Name**.
3. Show Record Count per course.
4. Save as **EnrollmentsbyCourse**

Activity 3: Create “Pending Enrollment Approvals” Report

1. New Report → Enrollments report type.
2. Filter: Enrollment_Status__c = "Requested".
3. Add columns (Student, Course, Owner, Created Date).
4. Save as Pending Enrollment Approvals.

Activity 4: Create “Revenue Report (Fees Paid)” Report

1. New Report → Enrollments report type.
2. Filter: Fees_Paid__c = TRUE.
3. Group by Course__r.Name.
4. Summarize Course_Fee__c or similar fee field.
5. Save as Revenue Report – Fees Paid.

Milestone 12 – Dashboards:

Activity 1: Create “Student Managemet Dnashboard”

Steps:

1. Go to **Dashboards** → **New Dashboard**.
2. Name: **Student Management Dashboard**.

3. Select folder → **Create**.
4. Select new Dashboard folder and Save.

Add components:

- **Donut Chart** → using **Students by Status** report.

- **Bar Chart** → using **Enrollments by Course** report.
- **Gauge** → using **Revenue Report – Fees Paid** (sum of revenue field).
- **Table** → using **Pending Enrollment Approvals** report.

4. Arrange components on canvas.

Click **Save** → **Done**.

Milestone 13 – Security Setup

Activity 1: Configure Profiles

):

1. Go to **Setup** → **Profiles** → **New** (or Clone **Profiles Required**):
 - **Admin** – Full access.
 - **Enrollment Officer** – Create/Update Enrollments.
 - **Instructor** – Read-only access to assigned Enrollments.
2. **Steps (example for Enrollment Officer fName:**

Enrollment Officer.

3. In **Object Settings**:

- Enrollment__c: Read, Create, Edit.
- Student__c / Course__c: Read (and Edit if required).

4. Save.

Repeatsimilarly for **Instructor** profile with **Read-Only** onEnrollments

Activity 2: Create Permission Sets

1. Goto **Setup** → **Permission Sets** → **New**.
2. Create **Custom Object Access** (additional access to project objects if needed).
3. Create **Dashboard Editor** (Create/Customize Reports& Dashboards permissions).
4. Assign to relevant users.

Activity 3: Configure Sharing & OWD

Steps:

1. Goto **Setup** → **Sharing Settings**.
2. Set **Organization-Wide Defaults**:
 - **Students (Student__c)**: Public Read/Write.
 - **Courses (Course__c)**: Public Read/Write.

- **Enrollments (Enrollment__c):** Private.

3. Save.

For Instructor access to assigned Enrollments, optionally:

- Add a **User lookup** on Enrollment (Instructor User).
- Use a simple **Record-Triggered Flow** to set **OwnerId= Instructor User** so they can see only their own records.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce user interface to verify the proper functioning of all implemented features of the Student Enrollment & Course Management System (SECMS). These include student, course, instructor, and enrollment record creation; validation rule checks for mandatory fields, eligibility, and enrollment constraints; verification of record type behavior for different course categories; flow execution for automated enrollment approvals and seat availability checks; and Apex trigger functionality to ensure automatic confirmation and record updates. Additionally, screenshots of generated reports and dashboards were documented to validate accurate data visualization, enrollment tracking, and performance monitoring. Submit the Screenshots while testing.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data
- Automated workflows
- Real-time reporting

Disadvantages

- Salesforce dependency

- Requires initial configuration effort

9. Conclusion:

The Salesforce Student Enrollment & Course Management System successfully streamlines the entire student academic lifecycle—from student registration and course creation to enrollment management, instructor assignment, approvals, revenue tracking, and reporting. By leveraging Salesforce’s automation tools such as validation rules, flows, approval processes, and dashboards, the system improves data accuracy, operational efficiency, and decision-making. This project demonstrates how Salesforce can transform manual academic processes into a scalable, reliable, and user-friendly digital solution.

10. FUTURE SCOPE

- Payment gateway integration
- Student self-service portal
- Analytics-driven insights
- Mobile access support

11. APPENDIX
